

Update 5/27/21

Update regarding Covid-19, for the protection of our riders, our staff, and our Community.

**EFFECTIVE IMMEDIATELY:**

- We have reduced vehicle capacity to half to allow for social distancing. When boarding the bus, please sit as far away from your driver and other passengers as possible.
- With reduced vehicle capacity comes unique challenges such as; possibly longer wait times, and requires flexibility with scheduling trips, esp. out of county.
- Drivers and clients are required to wear a mask at all times while on board the vehicle. Even after the mask mandate is lifted public transportation is an exclusion listed by the CDC. All public transportation, including shared ride is required to continue to wear a mask. Please see CDC website.
- All drivers are disinfecting after every client. If you are being picked up when they just dropped off, please allow them the extra time to sanitize.
- When you are through with your appointment, please be waiting where the driver left you off. Do not wander. We want to limit time out and exposure for everyone involved and being at the correct spot at your pickup time will help tremendously.
- Please tell customer service if you have any symptoms of Covid-19 at the time of booking, including fever or cough. We have even more precautions that can be taken if you need to be seen by a doctor for these symptoms.
- Please do your part and wash your hands frequently for 20+ seconds, and use hand sanitizer, if possible when traveling.
- We can also schedule trips to take you to be vaccinated. Please call the office to schedule.

We are here to help you! If you require travel, please call 570-278-6140. All reservations need to be called in as early as possible, 12pm at the latest. Thank you for your support and cooperation.
